Over 200 Items Tested by Hair Sample

No needles or blood tests

We use modern electronic equipment that works from a hair sample.

Our test is safe and has no harmful side effects. Medications will not affect this test.

Animals can suffer reactions to foods and household products in the same manner as humans.

Reactions can result in excess histamine and other inflammatory substances which can cause pain and inflammation anywhere in the body. Today your pet is subject to a wide range of foods and chemicals.

We have helped many pets suffering from such complaints as arthritis, itchy skin and digestive issues.

Disclaimer: this program is not intended to be construed as veterinary advice, nor is it intended to lead anyone away from a qualified practitioner. We make absolutely no claims to diagnose, cure, treat or prevent any disease. We cannot take any responsibility for those who may want to help themselves outside of our instructions. If your pet has a serious health condition, we urge you to obtain assistance from a qualified veterinary professional of your choice.
